

LinTech Bluetooth® hands-free carkit for 2 mobiles at the same time

LinTech's Bluetooth® hands-free carkits 'Comfort' can now be used with two mobile phones at the same time. The new LinTech 'Dualmode' allows at last the comfortable and legal usage of two mobiles while driving a car.

Just by pressing one button you can switch in a few seconds between two mobiles even if it's already ringing. The two mobile phones between the changeover is possible are shown on the display of the carkit.

The 'Dualmode' of course can be deactivated just for the conventional usage with one mobile phone.
