

AirLino[®]pro

- WLAN- Bluetooth- LAN 2.4/5.0GHz HiFi Multiroom Music receiver

Stream music wirelessly and take all the advantages of WLAN and Bluetooth!

Receive music over WLAN 2.4/5GHz or Bluetooth in HiFi quality synchronously in several rooms

If you want to play music wirelessly from your iPhone, smartphone, PC, tablet, media server or from the Internet, and even from a USB stick or old analog playback devices such as record players on your stereo or sound system, you can do so wirelessly with the AirLino[®]pro in high-quality HiFi quality.

Synchronous wireless distribution and playback is possible on up to 8 active audio systems simultaneously. Installation and operation of the AirLino[®]pro is a piece of cake.

Connect - Analog or Digital Input and Output

Simply connect the AirLino[®]pro HiFi music receiver with an analogue AUX connector (3.5 mm jack or cinch) or with the high-quality digital S/PDIF (TOSLINK) connector of your system. Now you can establish a direct connection via WLAN or Bluetooth to the AirLino[®]pro and play music.

You can also connect playback devices via the analog and digital inputs of the AirLino[®]pro and distribute the music to other AirLino[®]pro devices and play it synchronously.

Integrating into a WLAN network

With the free apps for Apple iOS, Android and Windows you can integrate the AirLino[®]pro into your WLAN network, so that you can use the entire range of your network and while retaining all previous functions of your device. This way you can even address several AirLino-Pro[®] devices at the same time (e.g. with iTunes) to listen to your favourite music on sound systems in different rooms. This makes synchronous multi-room transmissions possible. Of course, you can define the name of the AirLino[®]pro yourself via the app to avoid confusion.

LinTech

Functions:

- High-quality music playback from the Internet, Internet radio, USB stick, line-in, smartphone, PC or media server
- Easy integration into existing WLAN & LAN home network or via Bluetooth for audio playback
- Free iOS Android Windows App
- Support AirPlay 2®, DLNA, UPnP, Internet Radio
- Support Spotify Connect, Tidal, Qobuz, OpenHome
- Support Bluetooth 4.2
- Support USB 2.0
- Synchronous wireless audio playback in multiple rooms (Multiroom)

Technical data:

- Analog input and output
- Digital optical S/PDIF input and output
- Optical output level: -17 dBm
- USB 2.0 port
- LAN port
- Power supply: 5V / 0.8 A
- Dimensions: H 30 × B 128 × T100 mm
- Ports:
 - Analog input 3,5mm jack socket
 - Analog output 3,5mm jack socket
 - Digital optical TOSLINK input
 - Digital optical TOSLINK output
 - RS45 LAN
 - Mini USB DC 5V

Compatible Protocols:

- Spotify Connect
- AirPlay 2®
- UPnP
- OpenHome
- DLNA
- Multiroom with Songcast
- Bluetooth A2DP/AVRCP Sink

Playlists:

- Radio by Tunein
- TIDAL
- Qobuz

WLAN/LAN-Parameter:

- IEEE 802.11 ac/b/g/n, 2.4 und 5 GHz
- WPA/WPA2
- 10/100 Mbps Ethernet

DAC (Digital-Analog-Converter):

- WOLFSON WM8524
- 24bit / 192kHz

Audio formats:

- MP3
- AAC
- FLAC
- ALAC
- Vorbis/Opus
- WMA
- AC3
- APE/WavPack
- MIDI

Container format:

- MP4
- MKV
- OGG
- WAV
- AIFF
- ASF

Scope of delivery:

- AirLino®*pro*
- Power supply unit
- Audio cable (Optical TOSLINK)
- Audio cable (3,5mm jack to 2x Cinch)
- Audio adapter (2x Cinch to 3,5mm jack)
